EDUCATION

Bachelor of Science in Cybersecurity

05/2019 - 05/2024

Rochester Institute of Technology

Rochester, U.S.A

• Academic scholarship.

• CGPA: 3.73/4.00 (Magna Cum Laude).

TECHNICAL SKILLS

- Hacking Tools: Metasploit, Nmap, Hydra, Hashcat, Burp Suite, John the Ripper, Wireshark, Responder.
- Programming Languages: Python, Java, Assembly language, HTML, CSS, Rust, PHP, JavaScript, SQL.

PROFESSIONAL EXPERIENCE

Information Technology Network Co-Op (Internship)

05/2023 - 12/2023Rochester NY, U.S.A

Wegmans Food Markets Inc.

- Managed IT systems and network infrastructures of Wegmans Food Markets.
- Troubleshot network connections using packet capture tools along with a strong understanding of protocols (TCP/IP, FTP, SMTP, DNS, DHCP).
- Implemented configurations and security patches on CISCO routers, switches and access points.
- Configured Palo Alto firewalls to maintain secure web traffic flow.
- Worked with security monitoring tools such as Forescout and Crowdstrike to implement security controls.

Software and Systems Engineer (Internship)

05/2022 - 08/2022

Dubai, U.A.E

Neutral Fuels LLC.

- Automated data scraping from web portals using Python scripts.
- Developed Python scripts for company data processing and visualization.
- Built cross-platform mobile app with Flutter for enhanced business connectivity.
- Designed user-friendly front-end, integrated Microsoft authentication, and utilized Firebase database for app development.

Junior Consultant (Internship)

06/2021 - 08/2021Dubai, U.A.E

Dubai Future Labs.

- Conducted gap analyses to identify and address technological and non-technological project
- Developed and implemented Cybersecurity strategies to protect client projects from threats and vulnerabilities.
- · Advised clients on the importance of proactive Cybersecurity measures to mitigate risks and ensure data privacy and integrity.

PROJECTS

Cybersecurity Capstone Project: Stepping Stone Data Collection

- Built a functional network infrastructure and installed network services and vulnerabilities into the machines.
- Conducted a competition to have students attack the network and gathered network traffic using Wireshark.
- Programmed scripts using Python and worked with Python libraries to detect stepping stone attack pattern.

Cybersecurity Projects

- Member of the R.I.T Security Club. Participated in penetration testing and ethical hacking events.
- Attended BsidesROC 2024 Cybersecurity conference. Participated in MetaCTF competition. Solved web, binary, and SQL injection challenges.
- Participated in DICE CTF and 0xL4ugh CTF competitions. Solved web, binary, and SQL injection challenges.
- Performed Password brute force attacks on Windows Active Directory applications using Hydra, and Patator.
- Utilized Nmap to perform extensive network scans and identify hosts and vulnerabilities.
- Exploited vulnerabilities on machines using Metasploit sessions.
- Utilized tools such as Burp Suite to set up proxy interception and exploit web vulnerabilities.
